# Junior Front-end Developer

Apply now >

### Location

Danmark, Billund, Syddanmark

### Job ID

DK9489

### Category

Information Technology

### Language

EN

Are you a curious techie with a passion for awesome user experience? And do you want to learn and to grow your technical skills in an environment where creativity and fun at work are at the very top of the daily agenda?

Then this is your opportunity to play with the best and to contribute to the frontend development part of building a new cloud-based digital asset management platform!

## Core Responsibilities

You will get your hands deep into the product team activities while being backed up – and challenged by an experienced mentor. Expect to become fully integrated into solid value driven feature deliveries and to take part in development sprints together with fun, friendly, and highly professional colleagues in an innovative environment!

You will collaborate closely with other front-end developers, back-end developers, business domain specialists, a UX specialist, a Scrum Master and a Product Owner in a newly established product team.

## As our new Junior Front-end Developer you will:

- contribute to the front-end development part of building a new cloud-based digital asset management platform that ensures consistency, scalability and confidentiality across the value chain
- contribute to the continuous improvement of the technology platform once implemented – a cloud solution based on serverless microservice architecture including technologies like React, TypeScript, Node.js and Python
- have the opportunity to work with back-end development as well - if you have the aspiration

## Play your part in our team succeeding

LEGO has built a new vision for the management of digital assets and launched an initiative with the main purpose of enabling Customers, Partners and LEGO Employees to easily and securely create, enrich and collaborate around digital assets throughout the entire value chain.

The value chain covers all phases from product development and production of assets to the usage by external and internal partners. LEGO digital product and marketing assets consist of images, text, content and product data.

As a cloud developer with focus on integration and foundation you will be part of one of the Digital Asset Technology product teams responsible for solutions facing our agency, sales people, customers and partners.

## Do you have what it takes?

You hold a Bachelor or Master's degree in Computer Science or a related technical field.

To succeed in this role, we expect that you are highly technically interested and that you have experience with:

- JavaScript - TypeScript specifically is an advantage
- REST web services

- one or more component libraries (e.g. React, Angular or Vue)
- testing of frameworks
- GraphQL - is a plus
- OAuth - is a plus
- AWS amplify - is an advantage
- security focused development
- UX
- working in an agile setup - is an advantage

You might be a newly graduate or have a few years of experience – we are open to both profiles as long as you have the right learning attitude and passion to dive into a new application area.

Furthermore, you:

- Love sharing your knowledge with others
- Are a phenomenal team player whilst still self-driven
- Are proficient in English, both written and verbally
- Pay the highest attention to quality and are diligent to details
- Engage and work with a proactive and positive attitude

Join the global LEGO® family

Children are our role models. Their curiosity, creativity and imagination inspire everything we do. We strive to create a diverse, dynamic and inclusive culture of play at the LEGO Group, where everyone feels safe, valued and they belong.

The LEGO Group is proud to be an equal opportunity and an affirmative action employer. We are committed to equal employment opportunity regardless of race, colour, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, gender identity or Veteran status.

We support our employees in being there for the moments that matter in life and celebrate families of all kinds, the loved ones that make us who we are. Being part of the LEGO Group also means taking part in our annual Play Day, playing a part in building a sustainable future and continuing our mission to "inspire and develop the builders of tomorrow."

Build your career brick by brick at the LEGO Group
